## COMPANY PROFILE

Rhino Maintenance Services saw the need to supply a highly geared economy without compromising quality, time and price. It was with this in mind that the inception of Rhino Maintenance Services was created in 1996. The company developed as the industry was subjected to various innovations. The core business of Rhino Maintenance Services is the supply of Electrical Components and Allied Equipment for the industry. The aim of the company is to alleviate buyers and Engineers of the task of sourcing Electrical products with the minimum cost of procurement. Our service frees the buyer unnecessary time in sourcing products at a competitive price.

Due to new development of an Eskom Power Station in Bronkhorstspuit we have recently opened a new branch in Bronkhorstspuit. There is also a Sasol Refinery and 2 new Coal Mines being opened in this area. We are currently servicing Mines, Industry and Contractors.

**Some of our Customers include Motor Vehicle Manufactures, Refineries, Foundries, Mines, Food Processing Chemicals and Nuclear Installations, Eskom and Electrical Wholesalers.**
